Barrette Structural Distribution, Inc. is proud to announce its new version of TRIFORCE® Analyzer standalone. This update contains small bug fixes and new improvements:

**New Automated Web Authentication Certificate:**

This new version now allows the automatic Web Authentication certificate renewal. No more manual installation!

The program will automatically and regularly check with our licence server. To achieve this, your computer needs to be connected to the Internet.

In rare occasion, or if your computer was disconnected from the Internet for a long period of time, you may have to manually prompt the automatic renewal of your Authentication Certificate by clicking on "install New Authentication Certificates" in the Help Menu.
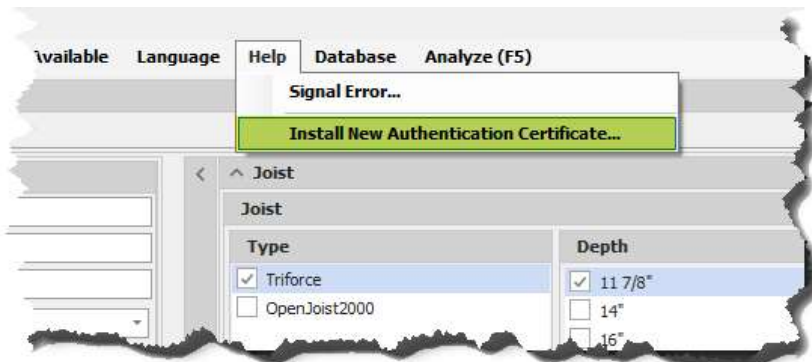

You will be prompt to enter the email submitted when requesting access to the software.
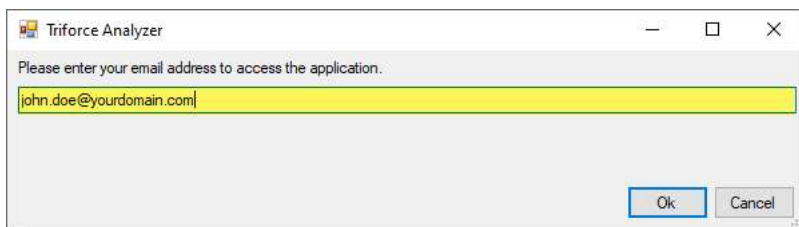

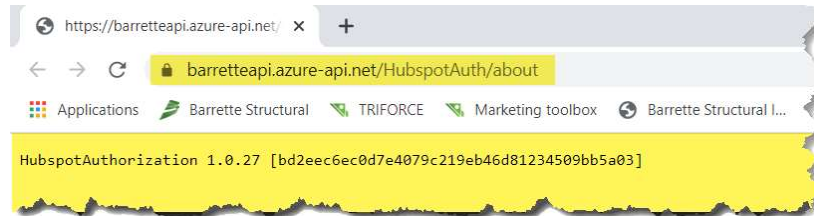

Troubleshooting:

If you have corporate security / internet access restrictions, please contact your IT department and ensure that you can access the following link:

https://barretteapi.azure-api.net/HubspotAuth/about

Your Windows browser will automatically open and you should get similar information:

After confirming the above and you cannot open Analyzer, or you have an error 400 or 500 in your Window browser, please contact our technical support team and we will gladly assist you.

IMPORTANT NOTICE

In keeping with its ongoing commitment to product development, Barrette Structural Distribution periodically update its TRIFORCE® Analyzer software. To help our engineering team and to assure you a prompt service, please note that we will not support any previous version. Please make sure you update to the latest version and verify your program settings at your earliest convenience.
